

German Gene Bank for Fruits - Network for Seabuckthorn

Brigitte Schramm, Bundessortenamt, Germany

1. General information about the Bundessortenamt (Federal Plant Variety Office)

Duties of the Bundessortenamt (extract):

- Granting national Plant Breeder's Rights for new plant varieties
- National listing of plant varieties as a prerequisite for marketing seed and plants
- Testing for Distinctness, Uniformity and Stability on behalf of the Community Plant Variety Office (CPVO) (-> Community Plant Breeder's Rights)
- conservation and sustainable use of plant genetic resources
- ...
- ...

conservation and sustainable use of genetic resources:

testing station Wurzen works together with other partners in the German Gene Bank for Fruits (Deutsche Genbank Obst)

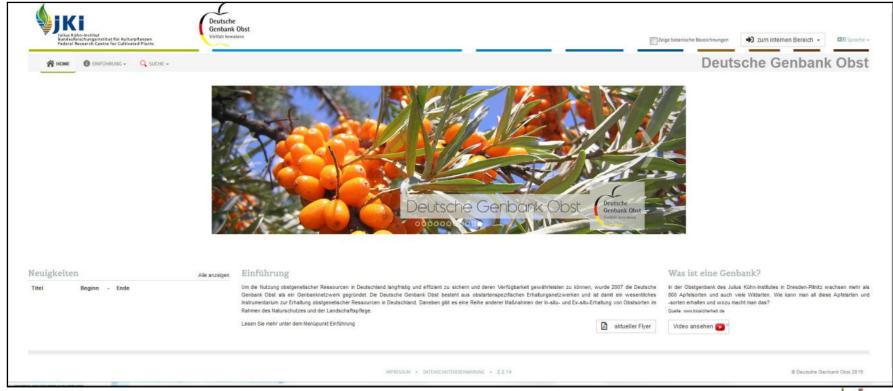

2. German Genebank for Fruits

- Coordination: Julius Kühn Institute for Breeding Research on Fruit Crops
- Decentralized network
- 7 species-specific networks, 27 different partners, 58 collections
- Collection of varieties with a german origin, with sociocultural, historic or local reference to Germany or varieties with important characteristics for breeding
- Collection and long-term secured, sustainable conservation of plant genetic resources
- promotion of the use of plant genetic ressources for example through provision of propagation material and freely available data
